2014 AT A GLANCE

735 yachts more than 80 feet under construction world-wide, up 6.2%

19 projects over 100 meters LOA sets new record

number of builders rises for first time in five years

15.5% increase in yachts building below 100 feet LOA

Taiwan yard production up by **32.4%**

U.S. yard production down by **6.5%**

ShowBoats International magazine, part of Boat International Media, is North America's premier luxury yacht publication. Its select readership includes high-net-worth superyacht owners, builders, brokers, captains, and designers.

By Raphael Montigneaux and the editors of *ShowBoats International* magazine

For a while, we've noticed activity leading us to believe that the yachting industry is on the road to recovery. Now we finally have some proof. For the first time since the financial turmoil and the record year of 2009 (when 1,008 new orders were recorded), the number of new build projects is higher than that of the previous year. This year's Global Order Book reveals that 735 new yachts are under construction or on order, a 6.2 percent increase over the 692 projects in the 2013 Order Book, and also up from the 2012 figure of 728. The reversal of a decreasing trend that lasted four years is certainly good news but warrants digging deeper to reveal a more accurate picture.

While little has changed among the world's five top yacht builder nations, with Italy still by far number one, a closer look reveals a few significant facts. The Netherlands and Turkey consolidate their places. The U.S. retains its fourth-place ranking thanks to the length of the projects, but it is losing its lead over U.K. builders, which as a group have grown significantly in the last two years—up 51 percent based on length of projects in build—and this year have eight more new

builds than their U.S. counterparts. While the rest of the world's builders are eager to cash in on the U.S. economic recovery, U.S. shipyards did not seem to benefit directly this year. Greece clinches the 10th place this year, pushing France out of the list. A few months ago French builder CMN, a member of the ADM Group, quietly refocused its strategy on commercial and navy contracts, temporarily shelving current and future superyacht projects.

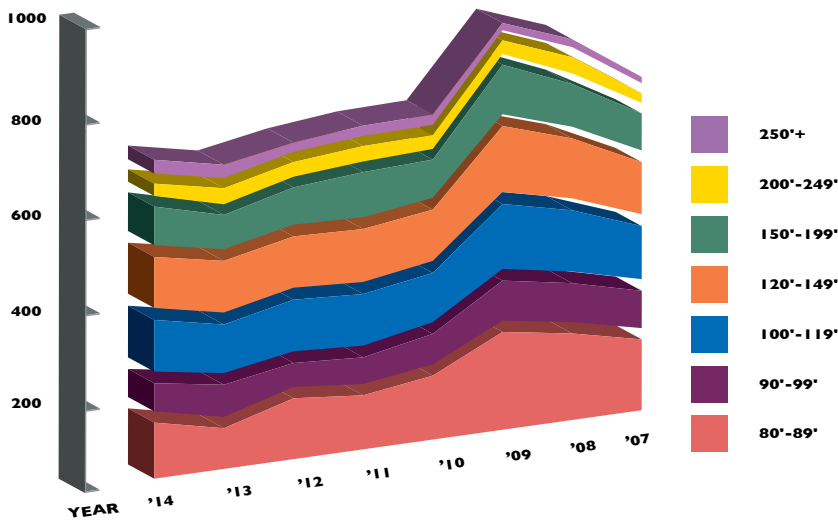

735 NEW YACHTS ARE UNDER CONSTRUCTION OR ON ORDER

Orders for the largest yachts—those exceeding 328 feet (100 meters)—have grown from 14 projects last year to 19 this year. Among these projects are four sailing yachts ranging in size from 331 to 482 feet, with the largest a not-quite secret project at Nobiskrug. A 331-foot project by Ed Dubois, which we anticipated in our 2013 report, was signed and brings the number of super sailing yachts currently under construction

Canados 120

NUMBER OF PROJECTS BY LENGTH

Overall, projects over 150 feet are up slightly from last year, 189 this year versus 186 last year, while there are currently 40 projects over 250 feet versus 39 last year.

NEW CUSTOMER GROWTH

While the big yachts often attract attention, and these multi-year custom projects are good news for shipyards, they represent just a small part of the yacht market. Perhaps one of the most positive trends that we noticed this year is a pick-up in new orders in the 80- to 99-foot segment. This part of the market suffered the most during and immediately post recession. From 213 projects last year, new orders in this segment grew to 246, a 15.5

to a historic high. Among the very large yachts are a number of flagships for pedigreed yards such as Lürssen, which recently sea trialed the world's largest yacht, the 591-foot Nauta-designed Azzam, due to handover near press time. Feadship is building its largest yacht yet, a 335-foot motor yacht, and Oceanco is constructing a 360-foot motor yacht in addition to a 354-foot sailing yacht, known as project Solar.

Several other established shipyards signed flagship motor yacht projects this year: Hakvoort announced a 207-foot explorer yacht; Mondo Marine a 197-foot yacht; Sanlorenzo a 194-foot yacht; Admiral Tecnomar a 181-foot hybrid yacht; and a relative newcomer to the superyacht builder circle, although an experienced boat builder, Gulf Craft is building its first 155-footer. With these interesting new orders, a few of the well-established yards now have enough work to keep them busy through 2016 and even 2017.

“SEVERAL ESTABLISHED YARDS SIGNED FLAGSHIP PROJECTS THIS YEAR”

* Does not include 10 projects from Amels.

** Does not include 16 builds from Lürssen and Amels not identified by length.

THE RULES & METHODOLOGY

The Global Order Book was established in 1992 by the editors of *ShowBoats International* to provide a body of data, updated annually in a systematic fashion, to show the scope of economic activity within the international luxury yacht industry. Each year, we present a list of yachts 80 feet (24 meters) and longer, on order as of September 1, at shipyards throughout the world.

Every effort is made by the editors to ensure that the Global Order Book data is comprehensive and accurate. We rigorously attempt to survey all the shipyards currently building yachts in the specified size range. Every shipyard receives the same list of rules and, whenever possible, shipyard data is cross-referenced with other industry sources. In many cases, the data is corroborated with personal visits to shipyards. Participation in the Global

Order Book is entirely voluntary and is free of charge. Qualifications for a project to be included in the 2014 Global Order Book are: Each yacht must be 80 feet (24m) or longer to be eligible. In one graph we have isolated custom yacht builders for comparison purposes. Builders such as Amels and Palmer Johnson that build series designs along with truly custom builds are included in the “custom” list due to the extensive customization of these vessels. New projects must be signed and with a minimum 10 percent deposit received by the shipyard by, on, or about Sept. 1, 2013. Speculative (“on spec”) construction may be listed, but only if actual construction, i.e. cutting metal, hull lay-up or tooling, is started by, on, or about the same date.

2014 GOB RANK	COUNTRY	TOTAL (M)	TOTAL (FT)	PROJECTS	AVG. LENGTH (FT)	2013 GOB RANK
1	Italy	10,686	35,059	274	128	1
2	The Netherlands	3,456	11,339	65	174	2
3	Turkey	3,120	10,236	70	146	3
4	USA	2,435	7,989	63	127	4
5	UK	2,081	6,827	71	96	5
6	Taiwan	1,724	5,656	56	101	6
7	Germany	1,457	4,762	16	298	7
8	China	900	2,953	26	114	8

10	Greece	412	1,352	5	270	not ranked

percent increase in one year. The bulk of these are production and semi-custom yachts, but an interesting trend is the appearance of custom projects in this size range from a few boutique shipyards, such as Conrad, JFA or in the U.S., Rybovich.

The cards have been redistributed a bit among shipyards building semi-production yachts, with an overall and continued decline in the number of smaller hulls built in Italy (perhaps due to the slow but continued decrease in the popularity of express cruisers). At the same time we see increasing numbers in the U.K. (notably with Princess Yachts going from 22 to 30 new orders), as well as China and Taiwan. While Asia's affluent buyers prize established brands—which has attracted marquee builders such as Ferretti, Sunseeker, Sanlorenzo and many others to open dealerships in China—import taxes remain prohibitive. Homegrown shipyards are benefiting and are slowly increasing their production. A good example may be HeySea, now one of China's primary builders. The

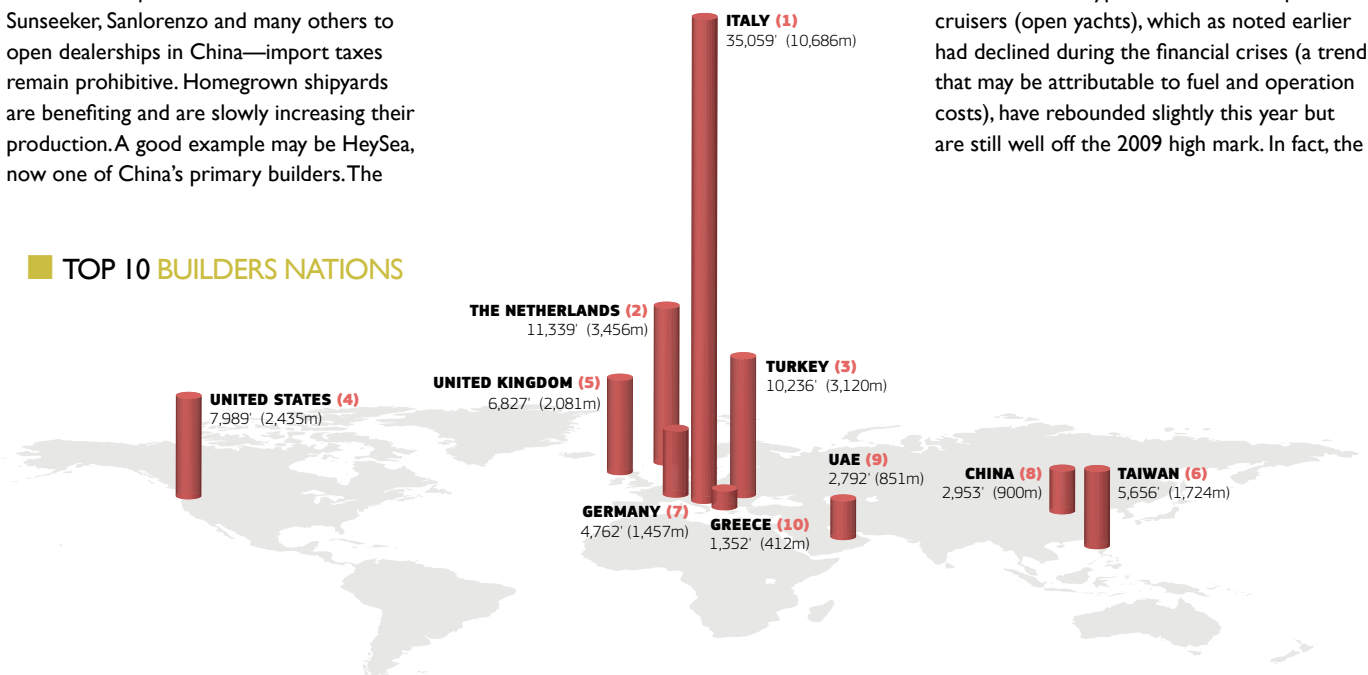

CURRENTLY 216 YARDS ARE BUILDING YACHTS 80 FEET LOA AND UP

yard's HeySea 82 series launched in September 2011, and the shipyard announced it had sold the 20th in the series in summer 2013. HeySea now has a new flagship series called Asteria 108, and it has reportedly received four orders. So while this new market in Asia is good news for worldwide shipyards, it also means increased competition from new domestic builders increasingly tapping the local and international markets.

Increased competition is felt all around as this year the number of builders worldwide rose for the first time since 2009. Currently 216 yards are building yachts over 80 feet. This growth appears to be driven by producers of smaller yachts who see an opportunity in the megayacht market.

As far as the type of boats built, express cruisers (open yachts), which as noted earlier had declined during the financial crises (a trend that may be attributable to fuel and operation costs), have rebounded slightly this year but are still well off the 2009 high mark. In fact, the

TOP 10 BUILDERS NATIONS

Willis is one of the most trusted names in Marine insurance, with unrivalled expertise in hull, liability and marine capabilities. By integrating the world's leading superyacht insurance specialists with the oldest marine insurance broker, Willis offers experience, ingenuity, best advice and unparalleled service to discerning superyacht owners.

We are proud that the owners of 10 of the world's largest 20 yachts and 24 of the largest 100 have already chosen Willis as their yacht insurance broker. Our yacht insurance specialists understand that a yacht is more than just a vessel, it is a passion.

Willis yacht insurance specialists are integrated with over 250 commercial marine insurance specialists to bring the best of both worlds to superyacht owners. The world's largest dedicated and most experienced marine team with over 70 insurance specialists complement the entire marine team by providing direct access to Lloyd's and London underwriters as well as those in continental Europe. No intermediaries are necessary and we are all Willis employed. When Lloyd's and/or London underwriters are used, a single budget item for all income earned by Willis is transparent to you.

production of new express cruisers is half of what it was then (with 51 new builds in this category versus 103 in 2009).

A trend that started post 2009 continues with sailing yachts and expedition-type vessels slowly increasing their market share. Sailing yachts have established a new high with 95 new builds, 11.8 percent more than we reported last year. Large sportfishers, however, have a life of their own, with erratic numbers that do not seem to follow a particular trend.

In the 2014 Global Order Book table you may notice a few hulls listed under a shipyard named “custom.” In most cases they are yachts under construction at one of the shipyards listed but for confidentiality reasons, the shipyards cannot officially acknowledge that they exist. This will change with time and we will be able to provide more details about them soon.

There has been a 39 percent increase in the number of projects listed as “on hold”, hulls that were started some time ago and have not been finished. They are still listed because they may be revived as the market recovers. In a few cases, they may be projects that were speculative in nature and did not find a buyer, or projects that stalled after their owners decided to slow, stop or even abandon the build. There are 46 projects in that category (up from 33), ranging in size from just under 87 feet to more than 200 feet, and one is an enormous project of 440 feet by the ADM shipyard in the Middle East. We are also aware of several signed contracts that do not appear in our table due to shipyard policies of not reporting the builds until metal is cut.

Refit activity continues to be an important revenue stream for shipyards, a number of them now having specialized teams dedicated to this activity. This includes prestigious shipyards that are currently active on the new build markets, such as Lürssen, Feadship and Royal

REFIT ACTIVITY CONTINUES TO BE AN IMPORTANT REVENUE STREAM FOR SHIPYARDS

Huisman. As the global fleet ages, logically this trend will continue. In fact, well-maintained yachts continue to be a good option, and the secondhand brokerage market has improved. With a few more months of data now giving us perspective, 2011 concluded with 262 sales (with a total sales value of \$3,283,975,297), including some very large yachts such as Pelorus; 2012 was even better with 272 sales thanks to an exceptional 4th quarter (total sales value of \$3,064,870,326). The forecast for 2013 shows a busy market. By mid-October, 249 sales were already recorded (amounting so far to \$2,473,160,985). While the number of sales is increasing, average prices are declining. The 2012 average was 10 percent below that of 2011, and the current trend shows an 11 percent decrease in average prices as compared to 2012.

This year again we have good reason to be optimistic, even if there still are a few areas of concern. The number of visitors at the fall shows in Cannes and Monaco was higher than previous years, and as we concluded the Fort Lauderdale International Boat Show, the mood is upbeat and the docks were crowded. Russian, Asian and American—North, South and Central—owners are definitively shopping, and we’ll see the effects on the next Global Order Book if the global economy continues to recover at a good pace. •
